**ImmPort Private Functional Requirements Version History**

<b>Version</b>	<b>Date</b>	<b>Description</b>
1.0	3/31/2016	Initial version of the ImmPort 3.0 Administrative requirements

## 1.1 USER MANAGEMENT AND AUTHENTICATION

### 1.1.1 Description

The Manage User design artifacts model system administration capabilities, which include allowing users to request system access (register) creating user accounts, updating user information, querying users, and deactivating users from the system.

### 1.1.2 Detailed Design

#### 1.1.2.1 Create/View/Update/Search User

The Create/View/Update/Search User depicts the events for creating/viewing/updating/searching a user account. The system collects the user information and creates a user account, provided the submitted data are valid. Once the user information is collected the system will display the data while giving the user an option to update the information.

#### 1.1.2.2 Create New User Use Case

**Actor:** A user with the SECURITY\_USER ROLE

**Pre-Conditions:** The actor has access to the User Administration

**Post-Conditions:** A user is created in the system with a default User Role and the default Roles of the Applications.

**Steps:**

1. The administrator clicks on the Create User menu link in the User Administration Application. The "**Create New User**" screen is displayed.
2. The administrator enters the user profile data.
3. The administrator selects the required applications for the user to have access.
4. The administrator clicks on Create User button.
5. The system creates a user in the system with Pending Status. This means the user is still not validated.
6. The system assigns the default roles of the specified Applications to the user and the default User Role.
7. The system creates a user in the ImmPort 2 database with Pending status. There is a trigger on the BISC\_SECURITY.USER\_INFO to populate the table in the DEVELOPER.USER\_INFO schema. Please refer to the trigger TR\_AIU\_BISC\_USER\_INFO.
8. A unique verification code is created for the user and the status is set to "User token has been sent to the user and is pending verification.
9. An email is created with a link which contains the verification token and is sent to the email address registered on the account.
10. The system displays a message indicating that the user has been sent an email containing a link. The user will need to click the link to confirm his registration and summary of his profile.
11. The user receives a confirmation email with a link to create his password.
12. The user clicks on the link and is redirected to create a password.
13. The user enters a password and confirms the password then clicks "Save Password".
14. The system sets the verification code to the status "User is verified" and the user account is activated.
15. The system displays a message indicating the password has been successfully set.
16. The user can then login to the original application with their username and password.

**1.1.2.3 Assign Roles to the new user**

**Create New User For ImmPort**

A user account is created with the following information. A message will be sent to the user on the email account to set his password on the account.

User ID	923

Edit Group Access

#### 1.1.2.4 Assign Roles to the new user Use Case

**Actor:** A user with the SECURITY\_USER ROLE

**Pre-Conditions:** The actor has access to the User Administration Application

**Post-Conditions:** A user is created in the system with a default User Role and the default Roles of the Applications.

1. The administrator will click on the “Continue to assign roles to the user” button.

2. The “**Search User**” screen is displayed with the user details, applications, groups, and roles are assigned. The administrator has the ability to modify the user’s details, applications, groups and roles.
3. The administrator will click on the “Edit Application Access” button then select and move the applications to the selected column.
4. The administrator will click the “Save” button to save the request or “Cancel” button to cancel the request.

#### **1.1.2.5 Email Activation Link has expired**

The link in the email sent to you has expired. Click on the link below to send a new email to set your password on your ImmPort account.

[Click here to send a new link to your email account.](#)

A new password link was sent to your email for setting your password on your ImmPort account. Please click on the link to set your password.

#### **1.1.2.6 Email Activation Link has expired Use Case**

**Actor:** A user with a PENDING\_USER ROLE

**Pre-Conditions:** The actor has access to the User Administration Application

**Post-Conditions:** A user is created in the system with a default User Role and the default Roles of the Applications.

1. The user clicks on the email link after the configurable expiration period.
2. The system displays a message stating the email link has expired and a new link is provided to receive a new email with a new activation and create password link.
3. When the user clicks on the link, the system sends an email and displays a message stating an email has been sent.

#### **Business Rules:**

- The Email Address and Login Name will be used to avoid duplication of the users in the database.
- The business rule for the Use Case Register User also applies.
- The password rules are
  - The password rules be:
    - The password must contain a minimum of 8 characters.
    - Passwords must use at least three of the four available character types: lowercase letters, uppercase letters, numbers, and symbols.

### 1.1.2.7 Search Users

The search user depicts the events for an administrator searching a user account based on certain criteria. After the search, the user may view/update more details about the selected user.

### 1.1.2.8 Search Users Use Case

**Actor:** A user with Admin Role.

**Pre-Conditions:** The user is logged in to the User Administration Application.

**Post-Conditions:** A list of users that match the criteria is displayed to the actor.

**Steps:**

1. The user clicks the Search User menu link in the User Administration Application or Search User from the ImmPort 2 Application.
2. The "**Search User**" screen is displayed.
3. The user enters the search criteria. The user can enter a few letters of the username or first name or middle name or last name or organization or status.
4. The system finds all the users matching the letters in any of the above mentioned fields.
5. The user can select a particular user from the dropdown and click on the enter button.  
The "**User Detail**" screen is displayed.

### 1.1.2.9 Update Profile

The update user depicts the events for an administrator updating a user account. Appropriate error messages are displayed if errors are encountered.

#### 1.1.2.12 Deactivate User Use Case

**Actor:** A user with Admin Role.

**Pre-Conditions:** The user is logged in to the User Administration Application.

**Post-Conditions:** A user is deactivated from the system.

#### Steps:

1. The admin clicks on the De-Activate Button. The De-activate button is only displayed if the user status is Pending or Active.
2. The system displays a message that the user is de-activated and the Status is changed to Inactive.

#### 1.1.2.13 Activate User

The activate user depicts the events for activating a user account that has been deactivated in the past. Appropriate error messages are displayed if errors are encountered.

#### **1.1.2.14 Activate User Use Case**

**Actor:** A user with Admin Role.

**Pre-Conditions:** The user is logged in to the User Administration Application.

**Post-Conditions:** A user will be activated in the system.

**Steps:**

1. The admin clicks on the Activate Button. The Activate button is only displayed if the user status is Pending or Inactive.
2. The system displays a message that the user is activated and the Status is changed to active.

#### **1.1.2.15 Reset Password**

The reset password depicts the events for resetting a user's account when the user has forgotten their password. Appropriate error messages are displayed if errors are encountered.

A login form with a light gray background. It contains two input fields: 'Username' and 'Password'. Below the 'Password' field is an orange 'Log in' button. To the right of the button is a blue link labeled 'Forgot Password?'.

A 'Forgot Password' form with a blue header bar. Below the header, there is a text input field labeled 'Email Address'. To the left of the field is the text 'Enter your registered email address'. Below the field are two buttons: 'Submit' and 'Reset'. At the bottom of the form is a green message box containing the text: 'A URL link will be sent to your email account. Please click on the link in the email to reset your password.'

Dear Cierra Smith,

**The link below will allow you to reset the password on your ImmPort Account.**

[Click here to reset your password](#)

This is an automated message. Please do not reply to this email, but contact [BISC\\_HELPDESK@mail.nih.gov](mailto:BISC_HELPDESK@mail.nih.gov) if you have any questions.

Please reset the password for username - CSmith

**Username:** CSmith

**New Password**

☐ Show password [Password Rules](#)

**Confirm Password**

Your password has been successfully reset. Please login with your username and new password.

**Welcome to the ImmPort system**

 **ImmPort**  
Select ImmPort to submit data.

 **Flow Analysis**  
The ImmPort Flow Analysis Module and FLOCK will help with your flow file analysis.

 **Open ImmPort**  
Open ImmPort is your portal to shared study data.

 **Cell Ontology**  
Cell Ontology Viewer is a new ImmPort tool for a visual representation of the Cell Ontology.

 **Cytokine Registry**  
Head over to the Cytokine Registry to download a curated list of cytokines, chemokines and receptors.

 **Flu Vaccine Analysis Tutorial**  
Flu Vaccine Analysis Tutorial will walk you through an example of re-analysis of shared data using R and Python.

 **ImmuneXpresso**  
ImmuneXpresso knowledge base identifies semantically related cells, cytokines and their relationships to one another.

Dear Cierra Smith,

**This email is sent to notify you that the password on the ImmPort account associated to this email has been changed.**

This is an automated message. Please do not reply to this email, but contact [BISC\\_HELPDESK@mail.nih.gov](mailto:BISC_HELPDESK@mail.nih.gov) if you have any questions.

### 1.1.2.16 Reset Password Use Case

**Actor:** A user with Admin Role.

**Pre-Conditions:** The user is logged in to the User Administration Application.

**Post-Conditions:** A user will reset a user's password.

**Steps:**

1. The admin clicks on the Reset Password Button. The Reset Password button is only displayed if the user status is Active.
2. The system displays a message that the user has been sent a email for resetting his password and user status is changed to Pending.
3. The user clicks on the URL link on the Reset Password Email.
4. The system displays the Reset Password screen
5. The user resets his password.
6. The system displays a Success Screen.

#### 1.1.2.17 Delete User

The delete user depicts the events for deleting a user account. Appropriate error messages are displayed if errors are encountered.

#### 1.1.2.24 Add a Role Use Case

**Actor:** A user with Admin Role.

**Pre-Conditions:** The user is logged into the User Administration Application.

**Post- Conditions:** A role will be added to the ImmPort3 Ecosystem

**Steps:**

1. The list of roles is displayed on the Role Page
2. The admin clicks on the Create New Role button.
3. The admin enters the role name, description and the application it is associated to.
4. The admin clicks Save Role.
5. The system saves the role in the database and it is displayed in the list of roles

#### 1.1.2.25 Modify a Role

Modify a Role depicts the events for allowing the Admin Role to modify a role in the ImmPort3 Ecosystem. Appropriate error messages are displayed if errors are encountered.

#### 1.1.3.10 Edit Roles associated to the Group Use Case

**Actor:** A user with Admin Role.

**Pre-Conditions:** The user is logged into the User Administration Application.

**Post- Conditions:** An Admin is able to edit the roles and user association to a group.

#### Steps:

1. The admin selects a group from the list.
2. The admin clicks on the Show Roles/Users associated to the Group.
3. The system displays the roles and users associated to the Group.
4. The admin clicks on the Edit Roles Associated to the Group button.
5. Please refer to the screens on how to modify the roles associated to a Group.

#### Business Rules

- A Group is assigned to a Particular Application.
- Every user by default will be assigned a role USER. This role will give the user basic access to the ImmPort Ecosystem.
- The different applications that belong to the ImmPort Ecosystem will be configured in the APPLICATION\_INFO table. For example: The Sharing Application may have its name configured as SHARING in the APPLICATION\_INFO table.
- Groups will be configured by Applications. The group name will have the naming convention as {APPLICATION\_NAME}\_{GROUPNAME}. For example the SHARING application can have groups like SHARING\_USER, SHARING\_ADMIN, etc.
- The groups will be assigned roles. The role name will have the naming convention as {APPLICATION\_NAME}\_{ROLENAM}. For example the SHARING application can have groups like SHARING\_USER, SHARING\_ADMIN, etc.

- The groups will also be assigned to a user.
- The roles for a user will be retrieved via groups.

### 1.1.3.11 Add an Application

Add an Application depicts the events for allowing the Admin Role to add an application in the ImmPort3 Ecosystem. Appropriate error messages are displayed if errors are encountered.

**Subject:** EXT :Registration Confirmation

Dear John Doe,

**Thank you for registering with ImmPort. An account was created for you. Please click on the link below to activate your account.**  
[Click here to confirm your registration](#)

This is an automated message. Please do not reply to this email, but contact [BISC\\_HELPDESK@mail.nih.gov](mailto:BISC_HELPDESK@mail.nih.gov) if you have any questions.

Thank you for activating your ImmPort account.

**Welcome to the ImmPort system**

 **ImmPort**  
Select ImmPort to submit data.

 **Flow Analysis**  
The ImmPort Flow Analysis Module and FLOCK will help with your flow file analysis.

 **Open ImmPort**  
Open ImmPort is your portal to shared study data.

 **Cell Ontology**  
Cell Ontology Viewer is a new ImmPort tool for a visual representation of the Cell Ontology.

 **Cytokine Registry**  
Head over to the Cytokine Registry to download a curated list of cytokines, chemokines and receptors.

 **Flu Vaccine Analysis Tutorial**  
Flu Vaccine Analysis Tutorial will walk you through an example of re-analysis of shared data using R and Python.

 **immuneXpresso**  
immuneXpresso knowledge base identifies semantically related cells, cytokines and their relationships to one another.

#### 1.1.4.2 Users Registration Use Case

The User Registration describes the process for registering for a user account.

**Actor:** Any user without an account.

**Pre-Conditions:** The user is new to the system and registering for the first time

**Post- Conditions:** A user is created in the system with the default User Role.

#### Steps:

1. The user clicks on the Sign up Free or Register for ImmPort Link on the ImmPort Production site.
2. The system will direct the user to the User Administration Application.
3. A "**Register User: Notice**" screen is displayed, the user clicks on the Continue button.
4. The system will display the "**Register User**" screen.
5. The user enters profile data.
6. The user clicks on the Register button.
7. The system stores the created user account in Pending Status in the database.

8. The system creates a user in the ImmPort 2 database. There is a trigger on the BISC\_SECURITY.USER\_INFO to populate the table in the DEVELOPER.USER\_INFO schema. Please refer to the trigger TR\_AIU\_BISC\_USER\_INFO.
9. A unique verification code is created for the user and the status is set to "User token has been sent to the user and is pending verification".
10. An email is created with a link which contains the verification token and is sent to the email address registered on the account.
11. The system displays a message indicating that the user has been sent a mail with a link and he will need to click the link to confirm his registration and summary of his profile as shown in User Profile Summary screen.
12. The user receives a confirmation email with a link as shown in the Email Confirmation screenshot.
13. The user clicks on the link and the system activates the account and Pending status is changed to Active Status.
14. The system sets the verification code to the status "User is verified".
15. The user is displayed the Account Activation screen.
16. The user can then login to the original application with his username and password.

#### **1.1.4.3 Email Activation Link**

The system will display a message when a user clicks the reset password link when it has already been clicked.

The password for this account was already set. If you want to reset your password again, please click on the Forgot Password link.

#### **1.1.4.4 Email Activation Link Use Case (Used Link)**

The Email Activation describes the process for a user to activate their account when they have already clicked the link to activate the account.

**Actor:** A user with an account.

**Pre-Conditions:** The user already activated their account.

**Post- Conditions:** A message is displayed to instruct the user to click on the “Forgot Password” link.

1. The user clicks on the email link again.
2. The system display the message that user is already activated.
3. The system displays the Account Already Activated Page.

#### 1.1.4.5 Email Activation Link Expired

The Email Activation depicts the sequence when an activation link has expired.

The link in the email sent to you has expired. Click on the link below to send a new email to set your password on your ImmPort account.

[Click here to send a new link to your email account.](#)

A new password link was sent to your email for setting your password on your ImmPort account. Please click on the link to set your password.

#### 1.1.4.6 Email Activation Link Use Case (Expired Link)

The Email Activation Link describes the process for registering a user account when the link expired.

**Actor:** A user with an account.

**Pre-Conditions:** The email link to activate the user's account has expired.

**Post- Conditions:** A message is displayed to instruct the user to click on the new link.

1. The user clicks on the email link after the configurable expiration period.
2. The system displays the Email Activation Link Expired page which shows a message that the link has expired and a new link is provided to get a new email with an activation link.
3. When the user clicks on that link, the Email Sent Page is displayed.

#### Business Rules:

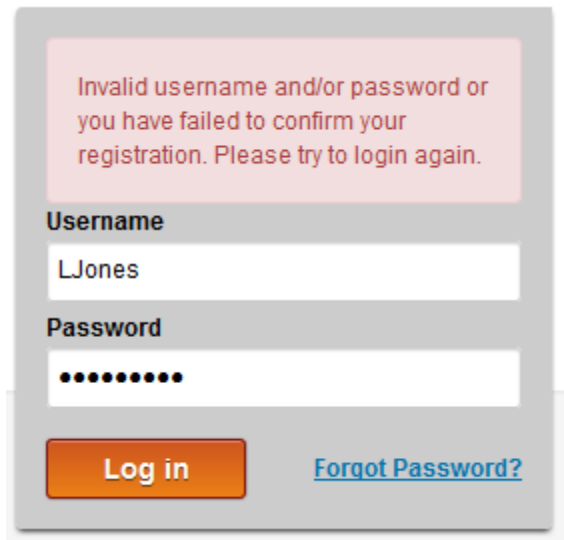

- The trigger TR\_AIU\_BISC\_USER\_INFO creates a user in the ImmPort 2 schema.
  1. Creates a user in the ImmPort 2 schema USER\_INFO table.
  2. A contract grant is created with the name as first\_name || '\_' || last\_name || '\_' || user\_id\_immport || '\_Contract' in the CONTRACT\_GRANT\_INFO table.
  3. The user is associated to the Contract Grant. (CG\_USER\_INFO)
  4. A project is created with the name as new.first\_name || '\_' || :new.last\_name || '\_Workspace' and it is associated to the Contract Grant that was created in step 2.
  5. The user is associated to the Project.(PROJECT\_ASSIGNED\_USER)

#### 1.1.5 Manage Access

In order to log into the ImmPort system, a unique user-id is required with a password. These are created during the registration process or creation of an account. The password is restricted to 8-12 characters with one being a numeric value. Appropriate error messages are displayed, if applicable.

#### **1.1.5.1 User Login-Not Validated**

The User login – Not Validated depicts the sequence of events for a user that attempts to login without validation.

The screenshot shows a login interface with a red error message box at the top. The message reads: "Invalid username and/or password or you have failed to confirm your registration. Please try to login again." Below the message are two input fields: "Username" with the text "LJones" and "Password" with masked characters "••••••••". At the bottom, there is an orange "Log in" button and a blue link labeled "Forgot Password?".

#### **1.1.5.2 User Login-Not Validated Use Case**

The use case describes the process of the user logging in for the first time before he is validated

**Actor:** Any user

**Pre-Conditions:** The user is logging in for the first time

**Post- Conditions:** An error message is displayed.

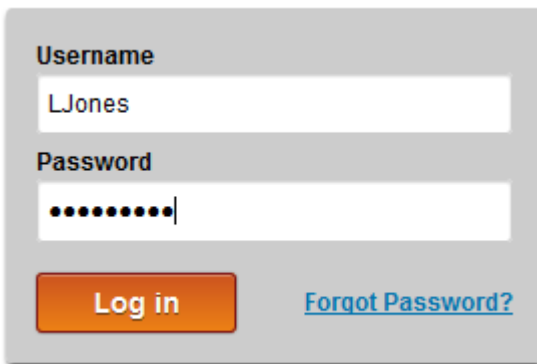

**Steps:**

1. The user accesses the application and logs into the system with his user name and password and clicks on the Login Button.
2. The System finds the user account in the database but it is not yet validated.
3. The system displays the Login Page with an Error message to the user "Invalid user name and password or you have failed to confirm your registration ".

#### **1.1.5.3 User Login**

The User Login depicts the sequence for a user to login to the system for the first time after validation.

A screenshot of a user login form. It has a light gray background. At the top, the label "Username" is in bold. Below it is a white text input field containing the text "LJones". Below the username field, the label "Password" is in bold. Below it is a white text input field with a password mask consisting of 10 black dots and a cursor at the end. At the bottom left is an orange button with the text "Log in" in white. At the bottom right is a blue hyperlink that says "Forgot Password?".

#### **1.1.5.4 User Login**

The use case describes the process of the user logging in for the first time after validation

**Actor:** Any user

**Pre-Conditions:** The user is logging in for the first time.

**Post- Conditions:** The user is logged into the system.

**Steps:**

1. The user accesses the application and logs into the system with his/her user login name and password and clicks the Login Button.
2. The System displays the Agreement Screen based on the application.
3. The user clicks on the Continue button.
4. The user is logged into the System.

**Business Rules:**

- NIAID funded applications will be shown the agreement screen.

#### **1.1.5.5 Forgot Password**

The Forgot Password Sequence Diagram depicts the sequence of events for a user that has forgotten their username/password.

Flu Vaccine Analysis Tutorial will walk you through an example of re-analysis of shared data using R and Python.

immuneXpresso

immuneXpresso knowledge base identifies semantically related cells, cytokines and their relationships to one another.

#### 1.1.5.6 Forgot Password Use Case

The use case describes the process of the user resetting his password pre-login.

**Actor:** A user who has an account

**Pre-Conditions:** A valid user.

**Post- Conditions:** The user is logged into the system.

**Steps:**

1. The user accesses an application and clicks on the Forgot Password link.

2. The system displays a Forgot Password screen for the user to enter his email address.
3. The user enters his correct email address.
4. The user clicks on the Submit button, a Reset Password Email Link sent to the user's email page is displayed.
5. The system sends the user an email with a Reset Password URL link which contains a unique code.
6. The system changes the status of the user to Pending. The user cannot login to the applications at this point even if he remembers his password.
7. The user clicks on the URL link in his email. A Reset Password page is displayed.
8. The user happens to enter the same password as his previous one. The system displays an error message.
9. The user enters another password then clicks on the Save Password button.
10. The system updates the password and activates the User Account.

**Business Rules:**

- The URL link that is sent to the user will be valid only for a certain time.
- If the user does not use the URL link within a certain time limit, the link will expire.

**1.1.5.7 Update User Profile**

The Update User Profile depicts the sequence of events for a user that updates their profile.

Update Profile for LJones

Username:	LJones
First Name:	<input type="text" value="Lynn"/>
Middle Initial:	<input type="text" value="Middle Initial"/>
Last Name:	<input type="text" value="Jones"/>
Organization:	<input type="text" value="NGC"/>
Phone Number:	<input type="text" value="152-456-7894"/>
International Phone Number:	<input type="text" value="International Phone Nu"/>
Email:	<input type="text" value="patricia.berger@ngc.com"/>
How may ImmPort assist your research efforts?	<input type="button" value="1 selected"/>
How did you learn of ImmPort?	<input type="button" value="Colleague"/>
<input type="button" value="Save"/> <input type="button" value="Reset"/>	

Update Profile for LJones

The user profile has been updated as:

User ID	931
Username	LJones
First Name	Lynn
Middle Initial	
Last Name	Jones
Organization	NGC
Phone Number	152-456-1234
International Phone Number	
Email	patricia.berger@ngc.com
How may ImmPort assist your research efforts?	I'm required to submit data to ImmPort
Other reasons how ImmPort may assist your research efforts?	
How did you learn of ImmPort	Colleague

#### 1.1.5.8 Update User Profile Use Case

The use case describes the process of updating a specified user profile.

**Actor:** A user with an account

**Pre-Conditions:** The user is logged into the system.

**Post- Conditions:** The user profile is updated in the database.

#### Steps

1. The user clicks the Update Profile menu in the User Administration Application or any Other Application.

2. The user needs to login to the User Administration Application if they are coming from any other Application.
3. The "Update User Profile" screen is displayed.
4. The user can update any of the editable data fields
5. The user clicks on "Save" button.
6. The System updates the user information in the database.

#### **Business Rules:**

- The email address has to be unique.
- The trigger TR\_AIU\_BISC\_USER\_INFO updates the corresponding fields in the DEVELOPER.USER\_INFO table.

#### **1.1.5.9 Change Password**

The Change Password depicts the sequence of events for a user to change their password.

A screenshot of a web form titled 'Change Password for username -LJones'. The form contains three input fields: 'Current Password', 'New Password', and 'Confirm Password'. Each field has a 'Show password' checkbox. Below the 'New Password' field is a link for 'Password Rules'. At the bottom of the form are 'Save Password' and 'Reset' buttons. Below the form is a green message box that says: 'Your password has been successfully changed. Please try to login to ImmPort with your new password.'

#### **1.1.5.10 Change Password Use Case**

This use case describes the process of changing the password of the logged in user.

**Actor:** A user with an account.

**Pre-Conditions:** The user is logged into an Application

**Post- Conditions:** The user password is updated

**Steps:**

1. The user clicks the Change Password menu link of the Application they are in.
2. The System displays the Change Password screen.
3. The user clicks on the Change Password button
4. The System updates the user information in the database with the new encrypted password and shows the Change Password Success Page

**Business Rule:**

Current Password and New Password cannot be the same.

The trigger TR\_AIU\_BISC\_USER\_INFO updates the corresponding fields in the DEVELOPER.USER\_INFO table.

## **1.2 PROGRAM, CONTRACT, PROJECT MANAGEMENT**

### **1.2.1.1 Create Program**

The create program diagrams depict the events for creating a program. Appropriate error messages are displayed if errors are encountered. Once the program is created, contracts are associated.

### 1.2.1.2 Create Program Use Case

The use case describes the process for creating a Program in the System.

**Actor:** A user with the BISCAAdministrator Role

**Pre-Conditions** - The user is logged into the System.

**Post- Conditions** - A Program is created in the database.

**Steps:**

1. The user accesses the ImmPort 3 Application website and clicks on the Create Program Menu.
2. A "Create Program" screen is displayed.
3. The user enters the data and clicks on the Create Program button.
4. The System creates a new Program in the database.

**Business Rules:**

#### 1.2.1.7 Update a Program Class Diagram

The use case describes the process of updating a Program.

**Actor:** A user with the BISCAdministrator Role

**Pre-Conditions** - The user has clicked the Update Program button on the View Program Detail screen or on the "Search Program" screen.

**Post- Conditions** - The program details are updated in the database.

#### Steps:

1. The user modifies the data on the "Update Program Details" screen.
2. The user can associate the Program to new contract-grants.
3. The user clicks on the Update Program button.
4. The System updates the data in the database.

#### Business Rules:

1. **IMM3-ADM-BR3** - The Contract Grants being added to this Program will be disassociated from the existing Program that they belong to and will be associated to the current Program.

### 1.2.1.8 Create Contract Grant

The Add/Update Contract diagrams depict the events for adding and updating a contract. Appropriate error messages are displayed if errors are encountered. Once the contract is added, a Principal Investigator, Program Manager and Other Staff is associated with the contract. Once the associated users are added, a default project may be created. The associated users to the contract will obtain access to the default project.

The use case describes the process of searching for a specific Contract-Grant.

**Actor:** A user with the BISCAdministrator Role

**Pre-Conditions** - The user is logged into the System.

**Post- Conditions** - A list of contract-grants matching the criteria are displayed.

**Steps:**

1. A "Search Contract-Grant" screen is displayed.
2. The user enters the search criteria and clicks on the Search button.
3. The user clicks on the Search button.
4. The system displays a list of Contract-Grants that match the criteria.
5. The user can select a specific Contract-Grant and click on the View Contract-Grant Details or Update Contract-Grant button.

### 1.2.1.10 View Contract Grant

Contract Grant Details for Asthma and Allergic Disease Center				
<b>Contract Grant Details</b>				
<b>Title:</b>	Asthma and Allergic Disease Center			
<b>Description:</b>	The research program of the University of Virginia has focused on investigating the etiology of asthma, looking both at risk factors for the disease and the complex events surrounding an acute episode. These studies have provided extensive evidence about effects of chronic exposure to indoor allergens, as well as the relevance of viruses to acute episodes in the hospital; the role of chronic sinus disease; and most recently the effects of pH changes in the lung lining fluid. In addition, the studies have addressed the mechanisms by which T cells contribute as effector cells and regulatory cells in allergic disease.
